

Hussain Murtaza

Full Stack Developer

Karachi, Pakistan | hussainmurtazawork@gmail.com | +92 337 7776853 | [linkedin.com/in/hussain-m-b3ab17404](https://www.linkedin.com/in/hussain-m-b3ab17404) | github.com/hussainmurtaza786 | portfolio-tan-iota-17.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience designing and shipping complete web applications end-to-end, from database schema and API design to polished, responsive frontends. Proficient across the Next.js/React/Node.js stack with PostgreSQL and Prisma ORM, with hands-on experience building authentication systems, admin panels, and eCommerce order flows for real clients. Comfortable owning a project independently and working within a team on larger builds. Currently pursuing a BSCS while developing CodeBlueprint, an AI-powered SaaS product, alongside freelance client work.

TECHNICAL SKILLS

Frontend: HTML, CSS, React.js, Next.js, TypeScript, Redux, Tailwind CSS, Framer Motion, Chakra UI, React Query, React Hook Form

Backend: JavaScript, Node.js, Python, Payload CMS, Prisma ORM, REST APIs

Databases: PostgreSQL, MongoDB, Firebase, NeonDB

DevOps & Cloud: GitHub, Vercel, Netlify, AWS

Security & Auth: JWT Auth, Zod, Yup

Languages: Python, JavaScript, TypeScript

PROFESSIONAL EXPERIENCE

Full Stack Developer — SyntaxFit Sep 2023 – Nov 2025 | Karachi, Pakistan

- Designed and built full-stack web applications using Next.js, React, Node.js, PostgreSQL, and Prisma ORM, covering database schema design, REST API development, and frontend implementation.
- Implemented authentication and authorization flows (JWT-based auth) and role-based admin panels for client applications, along with input validation using Zod/Yup.
- Built and consumed REST APIs to connect frontend applications with backend services, handling data fetching, caching, and state management with React Query.
- Worked in a team environment on shared codebases, coordinating on architecture, code reviews, and deployment (Vercel/AWS), while also independently owning and delivering full client projects.
- Grew from learning core full-stack fundamentals to independently architecting, building, and deploying production applications for real clients.

PROJECTS

POS App pos-app-seven-ochre.vercel.app

Next.js, React.js, TypeScript, PostgreSQL, Prisma ORM, Tailwind CSS

- Built a full-stack point-of-sale application with product/inventory management, order processing, and sales records, backed by a PostgreSQL database via Prisma ORM.
- Designed the API layer and data models for products, orders, and transactions alongside a fast, cashier-friendly checkout interface.

FoodZilla food-zilla-alpha.vercel.app

Next.js, React.js, TypeScript, REST APIs, Tailwind CSS

- Built a full food ordering and delivery platform end-to-end: menu/category browsing, cart and checkout, order tracking, wishlist, and user authentication (login/sign-up, order history, profile).
- Designed the backend data structure for menu items, categories, and orders, and connected it to a responsive storefront frontend.

Technobots53 technobots53.com

Next.js, React.js, TypeScript, Payload CMS, PostgreSQL

- Built the full website for a STEAM/robotics education company on a CMS-driven architecture, including a dynamic media gallery, program/service pages, and a school outreach lead-capture form with date/time scheduling.
- Set up content models in Payload CMS so staff could manage programs, competitions, and gallery media independently, without developer involvement.

MBK & Associates mbkandassociates.com

Next.js, React.js, TypeScript, Payload CMS, Tailwind CSS | Frontend Development (Team Project)

- Contributed as a frontend developer within a team on the corporate website for a law firm client, building responsive pages for practice areas (family, taxation, aviation, IP, insurance, banking law), attorney profiles, testimonials, and a blog.
- Built reusable UI components wired to a CMS-driven backend, allowing non-technical staff to manage expertise pages, team profiles, and blog content independently.

Shariq Traders shariqtraders.com

Next.js 14, Chakra UI v3, JWT Auth, Prisma ORM, PostgreSQL

- Built a full-stack eCommerce platform for a handcrafted wood products business, including category-based shop pages, a custom-order request system, blog section, and an admin panel with granular permissions.
- Implemented JWT-based authentication and a WhatsApp/email order flow in place of a payment gateway, matching the client's actual sales process.

EDUCATION

Bachelor of Science in Computer Science (BSCS) — Indus University Currently Enrolled | Expected 2029
