---

### SUMMARY

---

Motivated Full Stack Developer with practical experience gained through several independent personal projects and an internship at SyntaxFit, where I worked on real world web applications. Skilled in using HTML, CSS, JavaScript, React.js, Next.js, and TypeScript to build modern web solutions. Experienced in ensuring application reliability, creating responsive user interfaces across devices, and working with modern web technologies. I place strong emphasis on writing clean, readable, and maintainable code and can adapt quickly to new tools and frameworks. Comfortable managing application logic across the stack, while actively strengthening backend expertise and seeking opportunities to grow and contribute in a full stack development role.

---

### SKILLS

---

#### Web Frontend:

Html, CSS, JavaScript, React.js, Redux, Next.js, TypeScript, Tailwind CSS, Chakra UI.

#### Web backend:

Nodejs(JavaScript & Typescript), Python, Netlify, Vercel, CMS(Payload), GitHub.

#### Databases:

PostgreSQL

---

### PROJECTS

---

#### Food Zilla

A food Ordering Site: <https://food-zilla-alpha.vercel.app>

Developed a food ordering website with a fully functional CMS, allowing the admin to add, update, and delete products, which are dynamically displayed on the frontend. Built with Next.js, Redux, and Prisma, and integrated with Neon DB (PostgreSQL) for backend data management. The project aimed to create a seamless connection between the backend system and user interface, ensuring real time product updates and a smooth user experience.

#### POS System

<https://pos-app-seven-ochre.vercel.app>

Developed a POS system for managing sales, returns, inventory, products, expenses, and reports. The dashboard provides real time tracking of daily, monthly, and yearly sales and profits, while allowing seamless management of orders, returns, and inventory. Designed to offer a clean, user friendly interface for efficient business operations and data management.

#### Technobots53

<https://www.technobots53.com>

Developed a modern web application for a client using Next.js, Chakra UI, and Payload CMS for backend management. Built a responsive, user friendly interface with dynamic content management, enabling the client to efficiently manage and update website data. Focused on seamless integration between frontend and backend, clean code practices, and scalable architecture to support future enhancements.
